Title : IBM Information
Management DB2 Technical
Sales Mastery v1

Version : Demo

1.What are DB2 wizards?

- A.DB2 wizards programs are automated in DB2. They run as background processes of the database and they automatically configure database parameters.
- B.DB2 wizards are DBAs that are considered the top of their field in DB2.
- C.DB2 wizards are programs that assist you in completing a single task by stepping you through the task.
- D.DB2 does not have wizard functionality.

Answer:C

2.What is the role of the DB2 control center?

- A.The DB2 control center allows you to administer all your systems, instances, databases, and database objects.
- B.The DB2 control center is the main table where all metadata about the database is stored in a DB2 database.
- C.The DB2 control center serves as a collection of command-line entry commands that allow the DBA to administer the DB2 database.
- D.DB2 does not have a DB2 control center.

Answer:A

3.What is the DB2 command editor?

- A.The DB2 command editor is the initial command-line interface that allows you to install the DB2 product.
- B.The DB2 command editor is a new feature in DB2. It is a command-line tool that allows you to define and implement new SQL commands to be used in relational operations on the database.
- C.The DB2command editor does not exist in DB2.
- D.The DB2 command editor is a tool that allows you to work with query results; view graphical representation of the access plan for SQL statements; run commands in sequence; and create, save, and schedule the execution of scripts.

Answer:D

4.What is a DB2 transaction?

- A.A DB2 transaction is the interface that is developed between tables, relating one table to the other.
- B.A DB2 transaction is an action that is performed by the database to ensure that tables that are replicated are kept synchronized.
- C.A DB2 transaction is a set of rules that can be imposed on data values in a table.
- D.A DB2 transaction is a sequence of one or more statements that must complete in its entirety or not at all. It is also referred to as a unit of work.

Answer:D

5.With respect to DB2 security, what is authorization?

- A.Authorization is a process that checks whether you have sufficient privileges to perform the desired database operation.
- B.Authorization is the process where the DBA gathers information to see who will have access to the database.
- C.Authorization is the process where the DB2 database checks with Windows security to see if you have access to the DB2 database.
- D.Authorization is a process that validates that you are who you claim to be by verifying your user ID and password.

Answer:A
