# Exam : 646-056

Title: Advanced Routing and<br/>Switching Life Cycle<br/>Services (LCSARS)

## Version : DEMO

# 1.Which two tasks are conducted as part of the Migration Plan Development service component? (Choose two.)

A.Review high-level description of the design requirements, capabilities, features, and functionality of the existing and proposed infrastructure solution.

B.Analyze the business requirements to identify and align with technology and service requirements.

C.Identify network services to be migrated.

D.Define test scripts, use cases and scenarios that validate both operations and network management and security configurations.

#### Correct:A C

#### 2. Which two documents should be part of the Staging Plan Development? (Choose two.)

A.site requirements specification

B.staging project plan

C.bill of materials

D.low-level design template

#### Correct:A B

3.In the design phase, which two tasks are conducted as part of the produce business readiness test plan activity? (Choose two.)

A.Review the Network Implementation Plan, Low-Level Design, and Network Management System Design.

B.Finalize Operations and Network Management Design and Test Requirements Document Containing Specific Tests.

C.Verify Service Level Agreements.

D.Identify Implementation Risks.

#### Correct:A B

4.Which activity is performed to discuss the network implementation strategy with key stakeholders and business owners?

A.System Acceptance Testing

B.Presentation of Staging Plan

C.Conduct an On-site Discovery Workshop

D.Business Readiness Plan Development

#### Correct:C

5.Which service component within the prepare phase prescribes a set of activities and tasks to help identify and qualify an account for a customer opportunity?

A.Account Planning

B.Account Qualification

C.Business Requirements Development

D.High-Level Design Development

E.Technology Strategy Development

#### Correct:B

# 6.In testing for business readiness, what are three ways that success criteria should be classified? (Choose three.)

A.success with needed corrective actions

B.partial success pending next phase

C.complete success

### D.failure

## Correct:A C D

### 7.What should technical requirements and design goals be combined to create?

A.Detailed Design Validation

B.Low-Level Design

C.Service Level Criteria

D.Systems Acceptance Test Plan

### Correct:B

#### 8. Which task is conducted during the develop the systems acceptance test plan activity?

A.network resilience tests

B.compare test parameters against service level requirements

C.create logical topology diagrams

D.turn-up and commission tests

### Correct:B

9.Which service component within the prepare phase includes a set of activities and tasks to help plan an account for a customer opportunity?

A.Account Planning

B.Account Qualification

C.Business Requirements Development

D.High-Level Design Development

E.Technology Strategy Development

#### Correct:A

# 10.What is the correct order for performing the activities in the Change Management service component?

A.Originate, Schedule, Execute, Evaluate, Access, Communicate, Close

B.Evaluate, Originate, Schedule, Execute, Access, Communicate, Close

C.Evaluate, Communicate, Accept, Schedule and Execute, Originate, Close

D.Originate, Evaluate, Accept and Schedule, Execute, Communicate, Close

#### Correct:D
