3.Lucy noticed that, after a custom portlet was updated. java. lang. Class Not Found Exception messages started to appear in the log files. She has decided to use the Loader Service portal to help her diagnose the problem. Initially, she wants to turn on dynamic tracing.
Which Java class must be turned on for tracing?
A. com.ibm.wps-services.finder.*=all
B. com.ibm.wps.services.ClassLoader=all
C. com.ibm.wps.services.LoaderService=all
D. com.ibm.wps.services.ServiceManager=all
Answer: A

4.Alice logged into IBM WebSphere Portal and is impersonating Bob.
How does the audit log register this fact?
A. The user is shown as Bob-Alice in the log file.
B. The user is shown as [Bob [Alice]] in the log file.
C. The user is shown as [Alice [_Bob]]
D. The user is shown as [Bob_Imperson [Alice]] in the log file.
Answer: B

5.Sam is experiencing an error within IBM WebSphere Portal.
What should he do next to collect the right files to troubleshoot the problem before calling Support?
A. Compress the log archive and email it to IBM.
B. Use the IBM Support Assistant Data Collector.
C. Back up the file with the error to send after opening the PMR.
D. Copy the snippet of the error into an email and send it to IBM.

Answer: A

6.John wants to know how the Garbage Collector of his portal works. Which set of embedded tools can he use?
A. Portal Monitoring Interface
B. Garbage Collector Analysis
C. Performance GC Collections
D. Performance Monitoring Infrastructure
Answer: A

7.Chris has an IBM WebSphere Portal server that is configured with an IBM DB2 database. The passwords for the database users expired and the Portal server does not start. He changed the passwords on the database itself.
What steps should be taken to correct the Portal configuration before the server is restarted?
A. Update the passwords in jndi.properties and run the update-properties ConfigEngine task.
B. Update the passwords in wkplc.properties and run the database-transfer ConfigEngine task.
C. Update the passwords in wkplc_dbdomain.properties and run the connect-database ConfigEngine task.
D. Update the passwords in AccessControlDataManagementService and run the validatedatabase-connection ConfigEngine task.
Answer: B

8.Cole wants to grant to all members of Groupl the authority to customize any page under the Home label, for example by adding or moving portlets on these pages. He wants all other users to view the pages under the Home label exactly as the administrators configured them.
What role assignments or role blocks, or both, should Cole set?
A. Assign Groupl the Editor role on the Home label. Set a propagation role block on the Privileged User role on the Home label.
B. Assign Groupl the Privileged User role on the Home label. Assign All Authenticated Portal Users the User role on the Home label.
C. Assign Groupl the Editor role on the Home label. Assign All Authenticated Portal Users the Privileged User role on the Home label.
D. Assign Groupl the Privileged User role on the Home label. Set a propagation role block on the Privileged User role on the Home label.
Answer: B

9.What is the prerequisite for using vanity URLs?
A. Shared pages
B. Custom pages
C. Managed pages
D. Community pages
Answer: C
Reference:http://www01.ibm.com/support/knowledgecenter/SSHRKX_8.5.0/mp/wcm/van_url_cfgtsk_enable_vus.dita(se e the note)

10.Moshe is considering his options to administer a set of IBM WebSphere pages by using WebDAV. Which task or action can he do to perform page administration?
A. Move pages.
B. Change metadata of pages.
C. Modify the unique name of pages.
D. Create pages to have only static content.
Answer: A
