Title : Certified Information Privacy
Technologist

Version : DEMO

1.An organization is launching a new online subscription-based publication. As the service is not aimed at children, users are asked for their date of birth as part of the of the sign-up process. The privacy technologist suggests it may be more appropriate ask if an individual is over 18 rather than requiring they provide a date of birth.

What kind of threat is the privacy technologist concerned about?

- A. Identification.
- B. Insecurity.
- C. Interference.
- D. Minimization.

Answer: D

Explanation:

By suggesting that it may be more appropriate to ask if an individual is over 18 rather than requiring they provide a date of birth, the privacy technologist is concerned about minimizing the amount of personal data collected. This helps reduce privacy risks by limiting the amount of personal data that could potentially be exposed in a data breach.

2.Which of the following is an example of drone “swarming”?

- A. A drone filming a cyclist from above as he rides.
- B. A drone flying over a building site to gather data.
- C. Drones delivering retailers’ packages to private homes.
- D. Drones communicating with each other to perform a search and rescue.

Answer: D

3.Organizations understand there are aggregation risks associated with the way the process their customer’s data. They typically include the details of this aggregation risk in a privacy notice and ask that all customers acknowledge they understand these risks and consent to the processing.

What type of risk response does this notice and consent represent?

- A. Risk transfer.
- B. Risk mitigation.
- C. Risk avoidance.
- D. Risk acceptance.

Answer: A

4.SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client’s office to perform an onsite review of the client’s operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client’s office. The car rental agreement was electronically signed by Chuck and included his name, address, driver’s license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered

owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card. Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

What is the strongest method for authenticating Chuck's identity prior to allowing access to his violation information through the AMP Payment Resources web portal?

- A. By requiring Chuck use the last 4 digits of his driver's license number in combination with a unique PIN provided within the violation notice.
- B. By requiring Chuck use his credit card number in combination with the last 4 digits of his driver's license.
- C. By requiring Chuck use the rental agreement number in combination with his email address.
- D. By requiring Chuck to call AMP Payment Resources directly and provide his date of birth and home address.

Answer: A

Explanation:

The strongest method for authenticating Chuck's identity prior to allowing access to his violation information through the AMP Payment Resources web portal would be option A: By requiring Chuck use the last 4 digits of his driver's license number in combination with a unique PIN provided within the violation notice.

5. After downloading and loading a mobile app, the user is presented with an account registration page requesting the user to provide certain personal details. Two statements are also displayed on the same page along with a box for the user to check to indicate their confirmation:

Statement 1 reads: "Please check this box to confirm you have read and accept the terms and conditions of the end user license agreement" and includes a hyperlink to the terms and conditions.

Statement 2 reads: "Please check this box to confirm you have read and understood the privacy notice" and includes a hyperlink to the privacy notice.

Under the General Data Protection Regulation (GDPR), what lawful basis would you primarily expect the privacy notice to refer to?

- A. Consent.
- B. Vital interests.
- C. Legal obligation.
- D. Legitimate interests.

Answer: A
