**Exam** : **DEA-1TT5**

**Title** : Associate - Information  
Storage and Management  
Exam

**Version** : DEMO

1.Which management monitoring parameter involves examining the amount of infrastructure resources used?

- A. Configuration
- B. Capacity
- C. Performance
- D. Availability

**Answer: B**

**Explanation:**

Capacity is a management monitoring parameter that involves examining the amount of infrastructure resources used. This includes monitoring storage capacity, network bandwidth, CPU utilization, memory usage, and other resources. Capacity management is important for ensuring that the infrastructure has sufficient resources to meet the demands of the business or customers. It involves predicting future resource needs, identifying capacity bottlenecks, and optimizing resource utilization to avoid performance degradation or service disruptions.

Reference: Section 2.2.2 Infrastructure Resource Monitoring, page 76.

2.What statement describes machine learning?

- A. Applies an algorithm to large amounts of data for pattern discovery
- B. Organizes data efficiently so that compute systems can learn
- C. Developing a program to compute every possible outcome
- D. Replicating a detailed process and then implementing it in software

**Answer: A**

**Explanation:**

Machine learning is a subfield of artificial intelligence that gives computers the ability to learn without explicitly being programmed [1]. It does this by applying an algorithm to large amounts of data in order to discover patterns and insights that can be used to inform decisions and predictions. This allows machines to learn from experience and make decisions in a way that mimics the human brain.

3.Which technology allows automation of sensors and devices to share and process information?

- A. Internet of Things
- B. Cloud computing
- C. Artificial Intelligence
- D. Deep Learning

**Answer: A**

4.In continuous data protection, what does the amount of journal space determine?

- A. Length of time required to recover the data
- B. Amount of space the source and replica volumes require
- C. Amount of data that can be restored to a specific point
- D. How far back the data can be recovered

**Answer: C**

5.Which product enables employees to enroll their mobile devices in an enterprise environment and ensures secure access from the devices to the enterprise resources?

- A. Dell PowerEdge
- B. Dell InTrust
- C. VMware AirWatch
- D. VMware AppDefense

**Answer: C**

**Explanation:**
