**Exam** : **HP0-702**

**Title** : Tru64 UNIX V5 Advanced  
Admin. Support &  
Performance

**Version** : Demo

1. Which output does the Active Answer sizer provide?

- A. MIB
- B. RIS
- C. BOM
- D. DMS

Answer: C

2. Which feature highlights a distinctive AdvFS advantage?

- A. RAID 5 support
- B. extent-based file allocation
- C. tuneable metadata buffer cache
- D. fragment-based file allocation

Answer: B

3. Which utility displays UFS parameters?

- A. dumpsys
- B. dumpfs
- C. dumpcdfs
- D. dumpufs

Answer: B

4. Which parameter is normally associated with tuning a database server?

- A. mbuf compression
- B. System V message queue
- C. TCP hash tables
- D. size of namei cache

Answer: B

5. Which command generates system configuration information and analysis?

- A. collect -f
  - B. sys\_check
  - C. pmgr D. vmstat
- Answer: B

6. Which standard command, or commands, help determine if a system is CPU bound?

- A. iostat and pstat
- B. vmstat
- C. vmstat and ps
- D. showproc

Answer: C

7. Which phrase best describes a Tru64 UNIX process?

- A. a user at a terminal
- B. an instance of a running program
- C. a collection of cooperating threads
- D. the basic unit of scheduling

Answer: B

8. Which utility compiles and displays the SCSI CAM I/O device database?

- A. ddr\_config
- B. ddrcc
- C. scu
- D. ddr\_dbase

Answer:A

9. Which types of files are used for I/O operations? Select TWO.

- A. text
- B. directory
- C. character special

D. block special

E. I/O special

Answer: CD

10. What is the role of swapping in Tru64 UNIX memory management?

A. to reclaim pages for reuse while the process is still active

B. to free large amounts of memory

C. to schedule a new process to run on a CPU

D. to increase the amount of physical memory available to a process

Answer: B

11. Which procedure starts system accounting?

A. nulladm the /var/adm/acct file, then issue the action command

B. nulladm the /var/adm/pacct file, then issue the startup command

C. nulladm the /var/adm/runacct file, then issue the sa command

D. nulladm the /var/adm/utmp file, then issue the runacct command

Answer: B

12. How many bytes are contained in a page of memory in Tru64 UNIX?

A. 512

B. 1024

C. 4096

D. 8192

Answer: D

13. Which service or kernel feature does an AlphaServer hardware device use to make service requests of the Tru64 UNIX kernel?

A. interrupts

B. system calls

C. traps

D. system faults

Answer:A

14. What is the role of paging in memory management?

A. to write the pages modified by a suspended process to swap space

B. to reclaim pages so they can be reused C. to notify a process of an external event

D. to block signals

Answer: B

15. Which is a top-down LSM command?

A. volmake

B. volassist

C. voldg

D. voldisksetup

Answer: B

16. Which command synchronizes plexes after a crash or disk failure?

A. voldiskadm

B. volreconfig

C. volrecover

D. volevac

Answer: C

17. Which directories contain the special device files for LSM volumes?

A. /dev/vol and /dev/rvol

B. /dev/lsm and /dev/rlsm

C. /dev/disk/vol and /dev/rdisk/vol

D. /dev/disk and /dev/rdisk

Answer:A

18. What does write-back caching do to improve performance on a RAID 5 set?

- A. stages writes in the controller's memory
- B. stages reads in the controller's memory
- C. allows writes to be passed directly to disk
- D. disables the HSZ cache module

Answer:A

19. Which file is referenced by the vold daemon during startup to locate copies of the rootdg database?

- A. /etc/rootdg
- B. /etc/vol/volboot
- C. /etc/inittab
- D. /etc/vol/voldref

Answer: B

20. Which is the order (top down) of the LSM object hierarchy?

- A. volume, plex, subdisk, physical disk
- B. plex, physical disk, volume, subdisk
- C. subdisk, volume, plex, physical disk
- D. physical disk, volume, subdisk, plex

Answer:A
