Exam : **MB6-503**

Title : **AX 4.0 Product Builder**

Version : **DEMO**

1.Database improvements to Microsoft Dynamics 4.0 include: Choose the 3 that apply.

- A.A change to Unicode to help support data in more languages than Microsoft Dynamics AX 3.0.
- B.ReclID improvements that help increase performance and scalability.
- C.A change in the Database Wizard to help make creating the database an easier task.
- D.A change to optimistic concurrency that helps shorten the amount of time that database objects are locked.

Correct:A B D

2.A system implementer working with a customer on moving from Microsoft Dynamics AX 3.0 to Microsoft Dynamics AX 4.0. What important effect to the database must be considered before upgrading to Microsoft Dynamics AX 4.0?

- A.The database can be converted without any special consideration.
- B.The Microsoft Dynamics AX 3.0 database must be converted to Unicode before upgrading the data to Microsoft Dynamics AX 4.0.
- C.The database cannot be upgraded but instead all the data must be manually exported from the old database and manually imported to the new database.
- D.The upgrade checklist will automatically handle any needed changes to the database.

Correct:B

3.A customer asks the implementer to install their production Microsoft Dynamics AX 4.0 on a single computer, in order to save money. What response would be appropriate for the implementer to give to the customer? Choose the 2 that apply.

- A.The single computer install should not be used in a production environment because of potential performance issues.
- B.The only appropriate place for a single computer install at a customer site is for development and testing.
- C.The single computer install would be the optimal install in a production environment.
- D.The single computer install is for Partners only and should never be used at a customer site.

Correct:A B

4.Which of the following is true in relation to the Help languages in Microsoft Dynamics AX 4.0? Choose the 2 that apply.

- A.It is possible to install help in multiple languages.
- B.The Help files for all languages are now installed by default.
- C.It is possible to view the Help files in multiple languages at one time on a Microsoft Dynamics AX 4.0 client.
- D.Users can switch between Help languages by changing the user settings in the Microsoft Dynamics AX 4.0 client.

Correct:A D

5.The Application Object Server (AOS) has been changed to a true Windows Service. What are the advantages of this change? Choose the 3 that apply.

- A.Improved server status reporting to the Windows event log. This lets administrators view errors and warnings that can help in troubleshooting problems.
- B.Eliminating the dependency on the Microsoft Dynamics AX 4.0 Server Manager removes a security threat by which an attacker can send a command to the AOS to shut it down.
- C.Changing to a true Windows Service means that the AOS service will always run as Administrator.
- D.The AOS service can be configured to start at system startup and continue to run even when no user is

logged into the system.

Correct:A B D
