Exam : **MS-101**

Title : Microsoft 365 Mobility and
Security

Version : DEMO

1. Topic 1, Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company has the employees and devices shown in the following table.

Location	Employees	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an on-premises Active Directory forest named contoso.com.

The forest contains the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Member server
Server3	Network Policy Server (NPS) server
Server4	Remote access server
Server5	Microsoft Azure AD Connect server

All servers run Windows Server 2016. All desktops and laptops run Windows 10 Enterprise and are joined to the domain.

The mobile devices of the users in the Montreal and Seattle offices run Android. The mobile devices of the users in the New York office run iOS.

The domain is synced to Azure Active Directory (Azure AD) and includes the users shown in the following table.

Name	Azure AD role
User1	<i>None</i>
User2	Application administrator
User3	Cloud application administrator
User4	Global administrator
User5	Intune administrator

The domain also includes a group named Group1.

Requirements**Planned Changes**

Contoso plans to implement the following changes:

- Implement Microsoft 365.
- Manage devices by using Microsoft Intune.
- Implement Azure Advanced Threat Protection (ATP).
- Every September, apply the latest feature updates to all Windows computers. Every March, apply the latest feature updates to the computers in the New York office only.

Technical Requirements

Contoso identifies the following technical requirements:

- When a Windows 10 device is joined to Azure AD, the device must enroll in Intune automatically.
- Dedicated support technicians must enroll all the Montreal office mobile devices in Intune.
- User1 must be able to enroll all the New York office mobile devices in Intune.
- Azure ATP sensors must be installed and must NOT use port mirroring.
- Whenever possible, the principle of least privilege must be used.
- A Microsoft Store for Business must be created.

Compliance Requirements

Contoso identifies the following compliance requirements:

- Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Intune and configured in accordance with the corporate policy.
- Configure Windows Information Protection (WIP) for the Windows 10 devices.

HOTSPOT

You need to configure a conditional access policy to meet the compliance requirements.

You add Exchange Online as a cloud app.

Which two additional settings should you configure in Policy1? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

New	Conditions	Device state (preview)
<p>Info</p> <p>* Name Policy1 ✓</p> <p>Assignments</p> <p>Users and groups 0 users and groups selected</p> <p>Cloud apps 1 app included</p> <p>Conditions 0 conditions selected</p> <p>Access controls</p> <p>Grant Block access</p> <p>Session 0 controls selected</p> <p>Enable policy On Off</p>	<p>Info</p> <p>Sign-in risk Not configured</p> <p>Device platforms Not configured</p> <p>Locations Not configured</p> <p>Client apps (preview) Not configured</p> <p>Device state (preview) Not configured</p>	<p>Info</p> <p>Configure Yes No</p> <p>Include Exclude</p> <p>Select the device state condition used to exclude devices from policy.</p> <p><input type="checkbox"/> Device Hybrid Azure AD joined</p> <p><input type="checkbox"/> Device marked as compliant</p>

Answer:

New	Conditions	Device state (preview)
<p>Info</p> <p>* Name Policy1 ✓</p> <p>Assignments</p> <p>Users and groups 0 users and groups selected</p> <p>Cloud apps 1 app included</p> <p>Conditions 0 conditions selected</p> <p>Access controls</p> <p>Grant Block access</p> <p>Session 0 controls selected</p> <p>Enable policy On Off</p>	<p>Info</p> <p>Sign-in risk Not configured</p> <p>Device platforms Not configured</p> <p>Locations Not configured</p> <p>Client apps (preview) Not configured</p> <p>Device state (preview) Not configured</p>	<p>Info</p> <p>Configure Yes No</p> <p>Include Exclude</p> <p>Select the device state condition used to exclude devices from policy.</p> <p><input type="checkbox"/> Device Hybrid Azure AD joined</p> <p><input type="checkbox"/> Device marked as compliant</p>

Explanation:

References: <https://docs.microsoft.com/en-us/intune/create-conditional-access-intune>

2. On which server should you use the Defender for identity sensor?

- A. Server1
- B. Server2
- C. Server3
- D. Server4
- E. Servers5

Answer: A

Explanation:

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.

3. You need to create the Microsoft Store for Business.

Which user can create the store?

- A. User2
- B. User3
- C. User4
- D. User5

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

4. You need to ensure that User1 can enroll the devices to meet the technical requirements.

What should you do?

- A. From the Azure Active Directory admin center, assign User1 the Cloud device administrator role.
- B. From the Azure Active Directory admin center, configure the Maximum number of devices per user setting.
- C. From the Intune admin center, add User1 as a device enrollment manager.
- D. From the Intune admin center, configure the Enrollment restrictions.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

5. On which server should you install the Azure ATP sensor?

- A. Server 1
- B. Server 2
- C. Server 3
- D. Server 4
- E. Server 5

Answer: A

Explanation:

References: <https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-capacity-planning>

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.
